## **NOTICES**

**DISTRIBUTION:** This report has been cleared for release to the Defense Technical Information Center (DTIC) to comply with regulatory requirements. It has been given no primary distribution other than to DTIC and will be available only through DTIC or the National Technical Information Service (NTIS).

**FINAL DISPOSITION:** This report may be destroyed when it is no longer needed. Please do not return it to the U.S. Army Research Institute for the Behavioral and Social Sciences.

**NOTE:** The views, opinions and findings in this report are those of the author(s) and should not be construed as an official Department of the Army position, policy, or decision, unless so designated by other authorized documents.

## REPORT DOCUMENTATION PAGE

1. REPORT DATE (dd-mm-yy) January 1997		2. REPORT TYPE Final Report		3. DATES COVERED (from. . . to) 28 Jun - 27 Oct 94	
4. TITLE AND SUBTITLE Modifying the Computerized Testing System				5a. CONTRACT OR GRANT NUMBER DASW01-94-M-8671	
				5b. PROGRAM ELEMENT NUMBER 63007	
6. AUTHOR(S)  Rohr, Jay J.				5c. PROJECT NUMBER A792	
				5d. TASK NUMBER 1222	
				5e. WORK UNIT NUMBER C06	
7. PERFORMING ORGANIZATION NAME(S) AND ADDRESS(ES) Rohr Applied Systems Corporation 17 Lipscomp Court Sterling, VA 20165				8. PERFORMING ORGANIZATION REPORT NUMBER	
9. SPONSORING/MONITORING AGENCY NAME(S) AND ADDRESS(ES) U.S. Army Research Institute for the Behavioral and Social Sciences 5001 Eisenhower Avenue Alexandria, VA 22333-5600				10. MONITOR ACRONYM ARI	
				11. MONITOR REPORT NUMBER Contractor Report 97-10	
12. DISTRIBUTION/AVAILABILITY STATEMENT  <u>Approved for public release; distribution is unlimited.</u>					
13. SUPPLEMENTARY NOTES This report is published to meet legal and contractual requirements and may not meet ARI's scientific or professional standards for publication. Contracting Officer Representative, Jacinto M. Silva.					
14. ABSTRACT ( <i>Maximum 200 words</i> ):  The following changes were made to the existing Computerized Testing system: a) Modified to use a computer mouse and joystick input devices. The calibration procedures and instruction screens were modified to function correctly with these new devices, b) The One-Hand Tracking test was added to the battery, and c) Program modified to recycle to a new examinee at the conclusion of testing. Changes to the source code were documented.					
15. SUBJECT TERMS Computerized testing; Psychomotor Test; Computer Calibration					
SECURITY CLASSIFICATION OF			19. LIMITATION OF ABSTRACT  Unclassified	20. NUMBER OF PAGES  2	21. RESPONSIBLE PERSON (Name and Telephone Number)  Michael G. Rumsey, 617-8275

## Final Report: Modifying the Computerized Testing System

1. **Purpose:** The objective of the work to be performed is to enhance the existing Computerized Testing System to be capable of receiving input from a computer mouse and joystick. As a result of adding these two devices to the list of potential input devices, it will be necessary to modify peripheral code including calibration procedures and instruction screens.

### 2. **Technical Objectives Met:**

a. Given the cost of each response pedestal with the required interface card is nearly \$1100, it is more cost effective and simple to adapt the existing test to a computer mouse and joystick input device. This was accomplished; the testing system now operates with a mouse or a joystick device. Calibration procedures and instruction screens were modified as needed.

b. Added the One-Hand Tracking test to the battery.

c. Finally, the battery was modified to prompt for a new examinee once an examinee has finished testing. This eliminated the need to re-execute the program for each examinee.

d. Provided documentation on changes to the program source code.

3. **Summary:** All objectives were met.
